Google Sheets/Docs  
Build Repair PC's  
Setup Networks

### PROFILE

As a highly motivated and detail-oriented professional with a Certificate IV in Information Technology - Website Development, I am eager to leverage my strong technical foundation and lifelong commitment to learning to embark on a career as a Full Stack Web Developer. I bring a unique combination of technical expertise and extensive experience in operations, team management, and logistics, providing me with exceptional problem-solving skills and a proven ability to deliver under pressure. My ability to adapt quickly to new technologies and methodologies positions me as a versatile candidate ready to tackle complex development challenges. With proficiency in both front-end and back-end development technologies such as React, Python, and MySQL, I have successfully created dynamic, responsive web solutions during my education. I am committed to delivering robust, user-friendly applications that align with modern best practices. Passionate about continuous learning, I am excited to contribute to a forward-thinking organisation where I can enhance my technical skills, collaborate effectively, and drive innovation in web development projects.

### EXPERTISE

- Front-End Development: Proficient in HTML, CSS, Bootstrap, React, and jQuery, enabling the creation of interactive, responsive, and visually appealing web pages.
- Back-End Development: Skilled in Python, Django, PHP, MySQL, and MongoDB to develop scalable, secure, and efficient server-side applications.
- Frameworks & Tools: Experienced with LAMP stack, GitHub for version control, and WordPress for content management systems.
- Web Design: Adept at using design tools like Photoshop, Dreamweaver, and Brackets to create engaging website layouts and interfaces.
- Collaboration & Project Management: Familiar with Agile methodologies and tools like Visual Studio Code to streamline development workflows.
- Systems Administration: Competent in managing Windows Server 2019 and multiple Linux distributions (Ubuntu, CentOS, RedHat) for server-side support.
- Networking & Hardware: Skilled in building and repairing PCs, setting up networks, and ensuring system stability.
- Data Management: Proficient in MS Excel, Google Sheets, and database integration to handle and analyse structured data.

### PROJECTS

- E-Commerce Storefront: Designed and developed a responsive online store using React for the front-end and Django with MySQL for the back end, including user authentication, product filtering, and cart functionalities.
- Portfolio Website: Built a personal portfolio using HTML, CSS, and Bootstrap to showcase professional skills and completed projects, integrating animations with jQuery.
- Inventory Management System: Created a full-stack web application using Python, Django, and MongoDB to manage inventory, monitor stock levels, and generate reports dynamically.
- Blog Platform: Developed a blogging platform with PHP and MySQL, featuring a user-friendly interface, content categorization, and secure comment sections.
- Data Visualisation Dashboard: Implemented a dashboard using React and Python to visualise sales data from a MySQL database, providing actionable insights through interactive charts.
- WordPress Custom Theme Development: Designed and deployed a custom WordPress theme for a local business, ensuring seamless integration with existing plugins and mobile responsiveness.
